# Agriculture and Nature Expert Panel Workplan 2019-2020

Nick Hutchings

## Workplan 2019-2020

- Method to estimate ammonia emissions from liquid manure applied to soil - assess sensitivity to rainfall
- Continue development of method to estimate ammonia emissions from synthetic fertilisers
- Revise methodology for direct emissions of nitric oxide
- Develop a methodology for indirect emissions of nitric oxide
- Continue the collaboration with TFRN (EPMAN/EPNB)
- Develop method to estimate ammonia emissions from crops
- Assess need for methodology for marine  $\text{NH}_3$  emissions
- Assess consequences of refinement of agriculture chapter of IPCC (2006) on Guidebook
